Some programs you find yourself saying why this program is a why not I have used this program in my community to get some safety issues cleared up that have saved real lives things people see everyday and say to themselves that is dangerous that should get fixed and I like being able to see all the posts without names because there will be people who will abuse the program by trying to get someone else to take care of a issue that is best taken care of neighbor to neighbor face to face we are all adults here in some varying degrees as an example someone's tipper buckets left at the curb all week that should have been handled differently see clic fix did not need to even see such a post SEE CLIC FIX is a excellent tool for this electronic world and the way the town of Enfield Ct handles every post is perfect and they are great people to take this on and make it work for all of us Thank You so much for considering this bill on see clic fix I am all for it sincerely Norman Gagnon Enfield Ct.
